5.Converting a captured data to DV format	10
6.Exporting a video to a DVCAM	13
7.Troubleshooting	15

1. Introduction

This User's Guide describes how to use, and troubleshoot the Adobe Premiere Plug-In for Adobe Premiere 5.1c.

If you use this Plug-In software, you can use the following functions:

- Capturing a video from a DVCAM
- Converting a captured data to DV format
- Exporting a video to a DVCAM

To use this Plug-In software, the followings are required:

- OS : Windows 98 SE(Second Edition), Windows ME(Millennium Edition), Windows 2000
- Premiere 5.1c (You don't need this Plug-In software if you use Premiere 6.0 or later.)

2. Installing the Plug-In software

1.Insert the CD-ROM into your CD-ROM drive.

Double-click on the E:\PlugIn\Setup.exe file.

```
(E means your CD-ROM drive. If your CD-ROM drive is not "E",
```

you must replace "E" to the appropriate drive letter.)

2. You will see the following window. Click [Next].

3.After confirming the destination of this Premiere 5.1c Plug-In, click **[Next]**. Usually you don't need to change this destination.

4.Select [Yes, I want to restart my computer now.] and click [Finish].

3. Setting up Premiere project

Connect a DVCAM to the 1394 port of your PC before you start Premiere. Confirm a DV tape is inserted in the DVCAM and the DVCAM is set to VTR mode.

1. When you start Premiere, New Project Settings dialog will show up. Click **[Load]**.

New Project Settings	2

2.You can play back, pause, fast forard, rewind, using the Device Control button if your DVCAM is set to VTR mode. Move the point from where you want to start capuring data. Then, play back the DV tape. Click [Record] to start saving an AVI file. To stop it, press the [ESC] key.

*Playback command will be sent to a DVCAM when you click [Record] even if a DV tape is stopped.

5.Converting a captured data to DV format

You can convert a captured data to DV format which allows you to export a video to a DVCAM.

1. While you create a project, select a format (e.g. CinePack) and do the video editting such as adding effect. After you have just finished video

editting, select [Export]->[Movie] from the [File] menu.

2.Building preview file will start.

3.Select a file you want to export. Click [Open] to start exporting

the video to a DVCAM.

NOTE

- 1.You can export only an AVI file which captured from a DVCAM directly or data which was converted to DV format as explained in 5.Converting a captured data to DV format.
- 2. While you export a video, the video isn't previewed on the movie capture window of your PC.

7.Troubleshooting

Q.You can't show a video in the capture window.

A.If you are using Windows 98SE, ME, click [My Computer] with the right button and select [Properties]. Click the [Device Manger] tab and confirm your camera and sound device are working properly. If you are using Windows 2000, click [My Computer] with the right button and select [Properties]. Click [Hardware] tab and the [Device Manger] button. In the Device Manger windows, confirm your camera and sound device are working properly.

Q.You can't export a video to a DVCAM.

A.To export a video, you need to open the capture window.
